Eric, Chip -

Please see below and attached, for your information. If you have any concerns about the disposal plans, please contact Jim or Bob. I believe Integral will notify the lab of the disposal instructions in approximately two weeks.

thanks,
Valerie

Subject: LWG Sediment Sample Disposal

Hi Valerie,

The attached file contains a list of LWG sediment samples that we will be authorizing the laboratories to dispose of. The Round 2 QAPP specifies that sediment samples will be retained for 12 months following completion of data validation. The attached list represents samples that were validated over 12 months ago. We will be instructing the laboratories to dispose of all sediment samples listed, while retaining the original jars for each sample submitted for archival. If fewer than 2 jars were originally submitted for archival because of limited sample mass, or if some of the archive jars have been used for analysis, we will be instructing the laboratory to retain 2 jars that have the maximum volume of sediment left. Using these disposal guidelines, selected sediment samples from the following tasks will be disposed of:

- Groundwater Pathway Assessment Pilot Study
- Round 2a Beach Sediment Composites
- Round 2a GW Pathway Assessment Co-located Sediment Grabs

- Round 2a Sediment Cores (Includes Natural Attenuation Study)
- Round 2a Sediment Grabs
- Sediment for Round 2b Benthic Tissue Study
- Round 2b Sediment Cores (except Round 2b archive samples).

Please don't hesitate to contact me if you have any questions or need further information.

Thanks!

Kim
